Summary

To excel as a Laravel developer by working for Web development through best utilization of my knowledge, skills, communication skill leading to better growth of self & economic advancement.

Experience

Tizaraa   **May 2025 - Present**
Software Engineer   Gulsan 2, Dhaka
https://it.tizaraa.com

- Modified and enhanced existing **HRM** and **CRM** systems by adding new features and improving functionality.
- Contributed to the **Tizaraa eCommerce system**, focusing on **admin and seller panel UI modifications** and bug fixing.
- Ensured smooth system performance by delivering reliable solutions and maintaining code quality.

Soft Deal IT   **Oct 2024 - April 2025**
Backend Developer   Rajshahi
https://soft-deal-it.vercel.app/

- Developed and designed scalable REST APIs with Laravel, ensuring secure authentication and smooth data flow.
- Structured and optimized MySQL databases for performance and reliability.
- Implemented new features, fixed bugs, and improved overall system performance.

Projects

Tailor and Febric Management   **April 2024 - April 2024**
Developed a fabric stock management system with in-and-out tracking, Punjabi make-to-order management, invoice generation and printing, and customer & supplier management.

Radiant Agrovet managememt system   **Dec 2024 - Feb 2025**
Developed a comprehensive web application for managing employees, customers, suppliers, and users with role-based access control (RBAC). The system includes features for brand and category management, order processing, sales tracking, invoice generation, financial reporting, cost management, and payment handling. The application provides a seamless experience for business operations with detailed reports and role-based permissions to ensure secure access control.
