Asikur Rahman

Backend Software Engineer — Laravel, Rest APIs, System Design

Professional Summary

Backend Software Engineer with hands-on experience in Laravel, API development, and scalable system design. Skilled in building HRM, ERP, and approval workflow systems, with a focus on performance optimization and clean architecture. Strong problem-solving mindset with real-world 8+ project experience.

Skills

Languages: PHP, JavaScript, TypeScript
Frontend: React.js, Vue.js, Next.js, Tailwind CSS, Bootstrap
Backend: Laravel, REST API Development, API Integration, API Security (Sanctum), Authentication & Authorization
Databases: MySQL, PostgreSQL, MongoDB, Query Optimization, Indexing, Data Modeling
Dev Tools: Git, GitHub, Postman, Jira, Agile/Scrum, GitHub Copilot, Cursor AI, Claude, OpenAI Codex
Core Concepts: MVC Architecture, OOP, System Design, Scalable Systems, Microservices
Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management

Experience

Tizaraa — House No: 15A, Road: 35, Gulsan 2, Dhaka 1212 May 2025 – Present

Software Engineer (Backend) — Software Team

- Develop and maintain Laravel-based backend systems for HRM and ERP enterprise applications serving Daiki Axis clients
- Built HRM system including employee management, attendance, leave, and late management
- Implemented an approval workflow system for business operations
- Developed Payroll module for salary processing and management
- Built Attendance API for tracking and reporting
- Reduced system latency and improved API performance using Redis caching and optimized queries
- Fixed critical bugs and ensured code quality
- **Tech**: Laravel, REST APIs, MySQL, Sanctum, Redis

Soft Deal IT — Rajshahi, Bangladesh Oct 2024 – Apr 2025

Backend Developer — Tech Team

- Developed custom web applications and APIs using Laravel
- Built business automation systems and multi-auth solutions
- Optimized APIs and improved system performance by 30%+ response time reduction
- Collaborated with the team to deliver client projects
- **Tech**: Laravel, REST APIs, MySQL, Sanctum

Projects

HRM System (Full Stack) — Unissol Group

- Developed employee management, attendance, leave, and late management modules
- Implemented approval workflow for HR processes
- Built payroll system for automated salary calculation
- Developed attendance tracking API
- **Technologies:** Laravel, Tailwind CSS, MySQL

Sales Management System (Full Stack) — Radiant Agrovet

- Developed product management, supplier, customer, employee, order, invoice, and reporting modules
- Built complete sales workflow from order creation to invoice generation
- A scalable sales automation platform handling high-volume transactions and workflow approvals.
- Supported business operations with 40+ employees and 600+ customers
- System generated 2500+ invoices and handled large transaction volume
- Contributed to 35M+ BDT sales in the last 1 year
- **Technologies:** Laravel, REST APIs, Sanctum, Spatie Role & Permission, React.js, Tailwind CSS, MySQL

Approval Process System (Backend) — Daiki Axis

- Developed modules for payment request, general expense, and Imprest/Advance request
- Implemented travel requisition and travel expense management system
- Built manpower requisition module with multi-level approval flow
- Designed dynamic approval workflow and reporting system
- Improved operational efficiency through automated approval pipelines
- **Technologies:** Laravel, REST APIs, MySQL

Training

Web Development with PHP & Laravel — Ostad Sep 2023 – Mar 2024

- Learned PHP, Object-Oriented Programming (OOP), MySQL, and the Laravel framework
- Built real-world applications and backend systems

SQA: Manual & Automated Testing — Ostad Mar 2025 – Nov 2025

- Learned the defect life cycle and test planning
- Performed manual and automated testing (UI, API, Web Automation)
- Practiced web scraping to ensure software reliability

Achievements

- Improved backend system performance through API and database optimization
- Delivered multiple scalable enterprise applications with clean architecture
- Built systems handling high transaction volumes and real-time operations

Education

Diploma in Computer 2021– 2024
Bangladesh Polytechnic Institute
CGPA: 3.81

Higher Secondary Certificate (HSC) 2018– 2019
Rajabari Degree College
GPA: 4.58
